

Sustainability report

Swisscanto (LU) Bond Fund Committed Corporate Hybrid

of 30.06.2025

Benchmark ICE BofA Gl. Hybrid Non-Financial Corp. Index (TR) (Constrained 3% per Issuer) hedged in EUR

Corporate portfolio weight 98.6%

Sovereign portfolio weight 1.4%

Sustainability Policy

In the implementation of the sustainability policy, a distinction is made between the two forms "Responsible" and "Sustainable." Depending on the form, the sustainability approaches listed below are applied. Further information on the sustainability policy can be found in the explanations.

Responsible				
Sustainable				
Stewardship	Controversies	ESG	Climate	SDGs
				
Voting / Engagement	Exclusions Responsible	Systematic ESG integration	CO2e reduction	SDG-aligned Investing

Notes:

- Light-coloured sustainability characteristics and approaches are not applicable to the assets in question.
- Exclusions in accordance with SVVK-ASIR (Swiss Association for Responsible Investments) are applied.

Engagement Report

Engagement overview

Portfolio

	% of Corporate portfolio	Number of issuers	Number of engagements
Total (* ex double counting)	1.00%	1	1
Environmental	0.00%	0	0
Social	1.00%	1	1
Governance	0.00%	0	0
UNGC watchlist	1.00%	1	1

Engagement progress

Portfolio

Largest positions under engagement

Portfolio

Issuer	Portfolio weight	Theme
CVS Health Corporation	1.04%	Human Rights

*In Switzerland, we conduct the engagements ourselves. Abroad, we have mandated Sustainalytics. The focus is on UN Global Compact principles, climate change, biodiversity, circular economy, and governance. With each company, we can lead engagements on different topics at the same time. At the portfolio level, these engagements are only counted once.

Exposure to controversies of the «Responsible» product line Corporate

Criteria	Portfolio weight	Benchmark weight	Number of issuers in benchmark	Criteria	Portfolio weight	Benchmark weight	Number of issuers in benchmark
 Coal reserves (ex. metal production)	0.00%	5.38%	4	 Exploitative child labour	0.00%	2.51%	1
Extraction of coal*	0.00%	0.55%	1	Controversial weapons	0.00%	0.00%	0
 Climate change		 Risk to society and health		Manufacture of weapons and ammunition	0.00%	0.00%	0
>5% revenue				Production of military hardware	0.00%	0.00%	0
				Production of pornography	0.00%	0.00%	0
				UN Global Compact violations	0.00%	0.00%	0

Exposure of the portfolio and benchmark to the corporate exclusion criteria applicable to the product. If an issuer violates multiple exclusion criteria, it is listed with each violated exclusion criterion. As a result, the reported exposure is usually higher than the net exposure of the portfolio and the benchmark, which is shown on the overview page, due to multiple counts. Exceptions may exist for individual criteria (e.g. for green or sustainability bonds), which are accordingly not counted as exposure to the criteria.

Largest controversial positions in the benchmark

Issuer	Portfolio weight	Benchmark weight	Criteria
Southern Company	0.00%	3.00%	Coal reserves (ex. metal production)
British American Tobacco p.l.c.	0.00%	2.51%	Exploitative child labour
Berkshire Hathaway Inc.	0.00%	1.28%	Coal reserves (ex. metal production)

ESG score & subscores

Weighted proprietary ESG, E, S and G scores for the portfolio and the benchmark. All corporate and sovereign positions with a score are included in the calculation. The scores are adjusted by dividing by the sum of the covered values.

Largest positions in the portfolio

Issuer	ESG score	Portfolio weight	ESG score previous year
Wintershall Dea Finance 2 BV	77	4.55%	44
Enel S.p.A.	97	4.08%	95
Volkswagen International Finance NV	70	3.86%	36
TotalEnergies SE	100	3.65%	99
BP Capital Markets p.l.c.	97	3.38%	95
Eni SpA	97	3.16%	98
EnBW Energie Baden-Württemberg AG	73	3.13%	55
NextEra Energy Capital Holdings, Inc.	79	3.11%	20
Enbridge Inc.	96	3.08%	96
Veolia Environnement SA	94	2.73%	99

Issuers without an ESG score are not shown.

ESG laggards

Portfolio weight	Benchmark weight	Number of issuers in portfolio	Number of issuers in benchmark
3.34%	9.94%	2	7

Exposure of the portfolio and the benchmark to ESG laggards. ESG laggards are companies that perform particularly poorly in terms of the proprietary ESG score in the respective peer group.

CO₂e intensity reduction

Portfolio

CO₂e intensity (corporate) tonnes CO₂e /
million USD revenue

356

Benchmark

CO₂e intensity (corporate) tonnes CO₂e /
million USD revenue

688

CO₂e intensity for Corporate is calculated by dividing Scope 1 & 2 greenhouse gas emissions (in tonnes) by revenue (in USD million). Estimates may be made for missing datapoints.

Breakdown of CO₂e intensity

Corporate by sector

Portfolio

Utilities 265 Energy 66 Materials 16 Other Sectors 8.4

Benchmark

Utilities 559 Energy 112 Industrials 6.1 Other Sectors 12

Contribution of sectors to the weighted CO₂e intensities of the portfolio and the benchmark.

Portfolio

Issuer	CO ₂ e- intensity	Share of CO ₂ - emissions	Portfolio weight	Benchmark weight
NextEra Energy Capital Holdings, Inc.	1'854	15.05%	3.16%	3.03%
Dominion Energy, Inc.	2'190	13.17%	2.34%	3.03%
Duke Energy Corporation	2'526	6.80%	1.05%	1.65%

Benchmark

Issuer	CO ₂ e- intensity	Share of CO ₂ - emissions	Portfolio weight	Benchmark weight
Southern Company	3'152	13.88%	0.00%	3.03%
Dominion Energy, Inc.	2'190	9.64%	2.34%	3.03%
NextEra Energy Capital Holdings, Inc.	1'854	8.16%	3.16%	3.03%

Positions in portfolio and in benchmark sorted by largest share of CO₂e intensity.

Sustainable Development Goals (SDGs)

- for information only, sustainability approach is not applied

17 United Nations Sustainable Development Goals (SDGs)

■ Portfolio ■ Benchmark

Sales (in %) of issuers or investments in green, social and sustainability bond positions in the portfolio and the benchmark that contribute positively (right side) / negatively (left side) to the achievement of one or more of the 17 UN Sustainable Development Goals (SDGs), weighted by portfolio allocation. If an issuer's product or service contributes positively/negatively to more than one goal, sales are allocated accordingly.

Largest green, social and sustainability bond positions in the portfolio

Issuer	Positively affected SDG	Position weight (%)
ENGIE SA.	2, 7, 9, 11, 12, 14, 15	3.71%
RWE AG	7	1.94%
Royal KPN N.V.	7, 11, 12	1.89%
EnBW Energie Baden-Württemberg AG	7, 11	1.78%
Iberdrola Finanzas SAU	7, 9, 12, 15	1.73%
Terna S.p.A.	7	1.67%
A2A S.p.A.	6, 7, 9, 11, 14, 15	1.66%
Veolia Environnement SA	7, 12	1.02%
Volkswagen International Finance NV	7, 11	0.84%
Remaining green, social and sustainability bonds		1.66%
Total green, social and sustainability bonds		17.90%

Issuers with the largest green, social or sustainability bond positions in the portfolio.

Explanations

Sustainability report

The sustainability report creates transparency with regard to the degree of sustainability of the managed fund or asset management portfolio (portfolio).

Corporate investments are those where the underlying is a corporation. Sovereign investments are those where the underlying are sovereign entities, states, and agencies.

Sustainability Policy

Sustainability Aspects

In the implementation of the sustainability policy, two aspects are distinguished, each applying different sustainability approaches. The "Responsible" aspect typically includes the application of exclusion criteria, systematic ESG analysis as an integral part of the investment process, and a reduction in the CO2e intensity of investments. The "Sustainable" aspect typically includes, in addition to the aforementioned approaches, the application of even more extensive exclusions and focuses on SDG and ESG leaders. For the application of the sustainability approaches, see the following explanations.

Stewardship - Voting / Engagement

As a shareholder, we actively engage in continuous dialogue with the companies management. This takes place in accordance with the engagement guidelines of Zürcher Kantonalbank's asset management. Among other things, companies are required to formulate ambitious greenhouse gas reduction targets, implement them consistently and report on them transparently. Our engagement activities and guidelines are published on <https://www.zkb.ch/en/home/asset-management/sustainability/investment-stewardship.html>. Our voting guidelines are based on Swiss and international corporate governance principles and on the United Nations Principles for Responsible Investment (UN PRI). The threshold for exercising voting rights in our foreign voting markets is CHF 2 million per shareholding. For Swiss shares, we vote across the board. More information on our voting behaviour can be viewed at: <https://www.swisscanto.com/voting>

Controversies - Exclusions Responsible

Application of further exclusion criteria - in addition to the exclusions based on SVVK-ASIR - in order to reduce sustainability risks and with the aim of not investing in securities with business models that are critical from a sustainability perspective. The exclusion criteria apply to companies associated with the extraction of coal (excluding metal production; >5% revenue)*, coal reserves (excluding metal production)*, production of weapons and ammunition, manufacture of military hardware (>5% revenue), production of pornography, exploitative child labour and/or UN Global Compact violations (excluding green and sustainability bonds, if applicable). Violations of the UN Global Compact principles revealed by our screening are examined in closer detail by our analysts. As part of the engagement, we seek dialogue and encourage companies to change their behaviour. If no change occurs within a reasonable period of time, existing systems must be sold. *Excluding green and sustainability bonds

ESG - Systematic ESG integration

The systematic analysis of ESG criteria forms an integral component of the active investment process, with the aim of identifying risks and opportunities based on ESG trends at an early stage. ESG criteria supplement the pure financial analysis and lead to more informed investment decisions.

Climate - CO_{2e} reduction

For active Responsible portfolios that do not follow a CO_{2e} reduction path, the CO_{2e} intensity of the portfolio is shown in comparison to the benchmark index. The CO_{2e} intensities are calculated from the CO_{2e} emissions in relation to the revenue of companies and in relation to gross domestic product for countries.

SDGs - SDG-aligned Investing

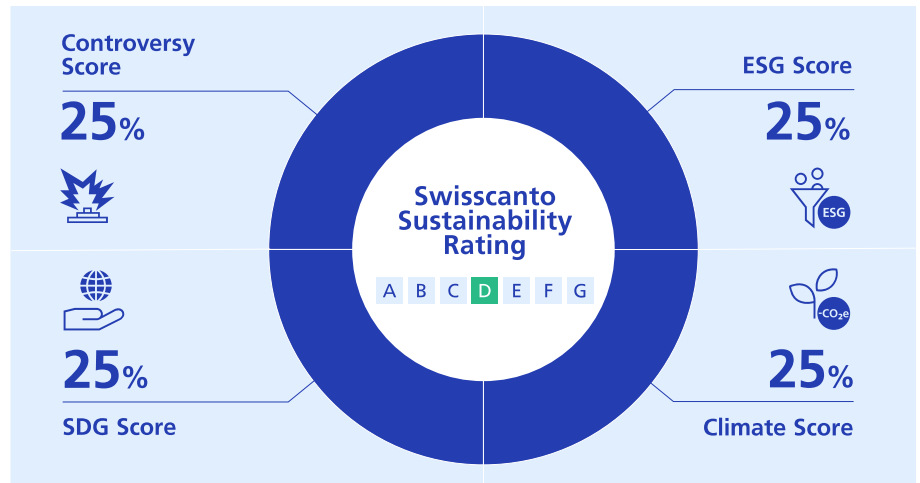

This approach focuses on returns through investments in companies and countries with social benefits (SDG leaders). SDG leaders use their investment power to create environmentally and socially responsible products and services. In doing so, they contribute to the fulfillment of one or more of the UN's Sustainable Development Goals (SDGs). For diversification purposes, a best-in-class approach can also be used to invest in securities that are considered to have above-average positive ESG criteria (ESG Leaders).

Detailed information on the fund-specific details can be found in the full sales prospectuses at products.swisscanto.com.

Explanations of Key Figures and Measurements

Swisscanto Sustainability Rating

The proprietary Swisscanto Sustainability Rating is calculated according to the values of the collective assets and individual securities contained in the portfolio and is divided into seven sustainability classes ranging from A (highest level) to G (lowest level). To calculate the rating, companies and states are assessed according to the four pillars of our sustainability research:

Controversy score: To what extent do controversial business areas, questionable business practices or violations of international standards exist?

ESG score: How sustainably is the company or state run?

Climate score: How large is the negative impact of the company or state on the environment with regard to CO₂e emissions?

SDG score: What impact does the company and/or state have on society and the environment in terms of achieving the 17 UN Sustainable Development Goals?

More information on the Swisscanto Sustainability Rating:
<https://products.swisscanto.com/products/document>

CO₂e intensity

For companies, all Scope 1 and Scope 2 greenhouse gases regulated in the Kyoto Protocol are taken into account (CO₂ equivalents, abbreviated to CO₂e). Scope 1 emissions originate from emission sources within the system boundaries considered. Scope 2 emissions arise from the generation of energy sourced externally. All other emissions (Scope 3) caused by the company's activities but not directly controlled are not taken into account due to a lack of data availability and quality. The emissions data for companies originates from ISS ESG. The emissions data used for states, regions and municipalities originates from EDGAR and complies with the United Nations Framework Convention on Climate Change (UNFCCC). For CO₂e intensity (CI), the total CO₂e emissions per year are standardised with the respective turnover (for companies) or GDP (for states, regions and municipalities). Missing CIs are supplemented with the industry median for companies. Within comparable peer groups, estimated CIs from ISS ESG are limited to the peer group's maximum reported CIs. For regions, cities and municipalities, the values of the corresponding state and for financing agencies the median of the respective financial sector are used.

For actively managed portfolios according to the Responsible approach, the compatibility of the portfolio with the Paris Climate Agreement (2-degree reduction target) is derived from the benchmark index as at 31 December 2019. The climate target is reduced by 4% plus nominal economic growth each year. The achievement of the 2-degree target for active, mixed (corporate and sovereign) funds is determined as follows: (Weight of corporate x deviation of corporate CI from 2-degree target) + (weight of sovereign x deviation of sovereign CI from 2-degree target).

Corporate Engagement

On the overview page of this report (page 2), the engagement activities with companies (and, where applicable, Swiss local authorities for fixed income instruments) in this portfolio are divided into five categories:

1. Swisscanto Engagement: Long-term discussions with primarily Swiss issuers by Swisscanto regarding specific ESG change objectives.
2. Sustainalytics Engagement: Long-term discussions with global issuers by our engagement service provider Sustainalytics regarding specific ESG change objectives or themes.
3. Swisscanto Dialogue: General discussions between Swisscanto and primarily Swiss issuers on ESG topics.
4. Under Monitoring: Swisscanto and/or Sustainalytics regularly monitor publications or media reports about controversial incidents or allegations against issuers.
5. No Engagement Activities: None of the above activities apply.

For investment funds, positions held directly or indirectly through Swisscanto funds are considered. For Swisscanto umbrella funds, a weighted average of the Swisscanto target funds is reported. All engagement data refers to activities during the 12-month period prior to the reporting date.

Share of controversies

The application of exclusion criteria (based on the SVVK-ASIR and any further exclusions) is the first step in the multi-stage investment process. We exclude companies if they pursue business activities assessed critically from a sustainability perspective or if they have a significant participation in such companies. If a company violates several exclusion criteria, it is listed multiple times in the detailed controversy report. Double counts are adjusted on the overview page for the portfolio or benchmark index. As a result, the total weight and number of companies in the detailed report does not always correspond to the weight or number of companies on the overview page. The data for the controversies is provided by MSCI ESG Research Inc.

This Sustainability Report refers to assets to which the Sustainability Policy is applicable, as well as a look-through on mutual funds and direct investments where available. For example, investments in derivatives of baskets of underlying issuers or investments in specific asset classes (foreign exchange, precious metals, commodities etc.) are not included in the assessment.

Data sources

Asset Management uses data from the following providers:

- MSCI ESG: Qualitative and quantitative environmental, social and governance data for companies and states. Used to calculate companies' ESG and SDG scores and controversies. (<https://msci.com/esg-integration>)
- Bloomberg: Quantitative data on compliance with ICMA criteria & Second Party Opinion Provider. Used for green, social and sustainability bonds. (<https://bloomberg.com>)
- The Emissions Database for Global Atmospheric Research (EDGAR): CO₂e data for states. Used for CO₂e reductions at state level. EDGAR is an EU Commission project that collects data on global past and present anthropogenic emissions of greenhouse gases and air pollutants for countries. Emission Database for Global Atmospheric Research (EDGAR) — European Environment Agency (<https://europa.eu>)
- Worldbank: Sustainability indicators for calculating the state rating. (<https://worldbank.org>)
- ISS ESG: CO₂e data and controversy data for companies. Used for CO₂e reduction at company level. Climate Solutions - ISS (<https://issgovernance.com>)
- IMF: Global GDP growth for targeted reductions (<https://imf.org>)
- SDG Transformation Center: SDG scores for states (<https://sdgtransformationcenter.org>)
